

SEALMAX™ DUST PLUGS

Cross Section Profile

(representative product)

Polypropylene Fin

The SEALMAX™ pile corner seal stops leaks and drafts because it joins the frame weatherstripping with the threshold. It makes the perimeter seals and door bottom a single functional unit.

The U.V. stabilized silicone-treated polypropylene fibers in the corner repel water and effectively seal out air, water, dust and noise.

The SEALMAX™ corner seal is ideal for filling any problem gaps around both doors and windows, SEALMAX™ plugs are the final touch in effectively sealing your product.

SEALMAX™ offers a wide range of options to meet your specific Dust Plug requirements.

Part Description	Backing Width	Pile Height	Fin	Adhesive Backing	Cont. Length	PCS

**check with your customer service representative for more details about the above and other dust plug products.

SEALMAX

The Sealmax brand started in 2000; however, we have been manufacturing weatherseal and weatherstripping since 1931. Originally doing business as Schlegel Canada Inc., Sealmax has undergone many changes since then, but one thing remains the same — quality products for windows and doors.
